

## ***DRAFT AGENDA***

### **SALISH SEA SHARED WATERS FORUM**

October 3-4, 2018  
Four Points Sheraton  
Bellingham, WA

#### **OVERVIEW**

##### **Forum Goal**

Exchange information to enhance oil spill prevention, preparedness and response to minimize the impact of oil spills to the Salish Sea and adjoining waters (the shared waters of Washington and British Columbia). This forum will provide an opportunity to discuss and share ideas in a non-voting and non-decision-making format and advance our collective knowledge about current policies and practices as a foundation for enhancements.

##### **Objectives**

1. Increase knowledge of Tribal, First Nation, British Columbia, Canadian, Washington State, and U.S. jurisdictions and authorities in maritime oil transportation safety
2. Share information on collaborative efforts underway to prevent and respond to spills
3. Provide an overview of marine shipping in the Cascadia region, including changes and trends
4. Include tribal and First Nations perspectives
5. Strengthen relationships and trust

##### **Overview of Sessions**

The Forum sessions are built around this story line:

*Follow the movement of a unit of crude oil as it travels from inland sources to the Salish Sea coastal and marine waters.*

The forum addresses three aspects of this story:

1. A description of the common operating picture of crude oil as it moves from inland to marine waters, including authorities and their roles.
2. Shared perspectives on the movement of crude oil from inland to marine waters from Tribes, First Nations, Industry, environmental groups and public representatives.
3. Collaborative efforts underway to prevent, prepare and respond to spills as crude transits from inland to the transboundary coastal and marine waters.

## AGENDA

| TIME                        | TOPIC   | SPEAKER/PANELIST  |
