Data analysis and summary report  
by Camille Stephens

## OIL SPILL DATA PROJECT

# Summary of Regional Spill Data (CY 2020)

The Task Force's regional oil spill database, which was launched in 2003, is a unique and valuable resource that enables us to track regional trends in spills and related causal factors. Using a standardized data dictionary to ensure uniform entries, we collect data on all spills of a barrel (42 gallons) or larger.

## DATABASE WORKGROUP

Database Workgroup provides staff-level coordination to help ensure that data is collected in a consistent manner by all Task Force member agencies. The Pacific States/British Columbia Oil Spill Task Force Data Dictionary (available at [oilspilltaskforce.org/ourwork/data-project/](http://oilspilltaskforce.org/ourwork/data-project/)) was developed by the Database Workgroup and establishes standardized terms and definitions for collecting spill data.

This year, the British Columbia Ministry of Environment and Climate Change Strategy joined the Database Workgroup. Their data is included in this report.

Workgroup members include:

- Angela Doroff (*Alaska Department of Environmental Conservation*)
- Andrea McIntosh (*British Columbia Ministry of Environment and Climate Change Strategy*)
- Cathy Conway (*California Office of Spill Prevention and Response*)
- Kimberlee Van Patten (*Oregon Department of Environmental Quality*)
- Liz Galvez (*Hawaii Office of Hazard Evaluation and Emergency Response*)
- Eli Seely (*Washington Department of Ecology*)

## DATA LIMITATIONS

- Each agency that assists in the creation and maintenance of the Task Force database in no way guarantees the accuracy of the information and no guarantee of accuracy shall be expressed or implied.
- Only spills of one barrel (42 gallons) or larger are included in our Database.
- Detailed information about small spills is often limited or unknown because the effort necessary to investigate them is cost-prohibitive. For this reason, we are presenting spill counts only.
- The Task Force oil spill database is created and maintained for informational purposes only. The data it contains reflects the respective agencies' best information at

the time it was entered in the database. This means that recorded quantities may be under-reported. It remains an ongoing challenge to refine the information entered to a level of specificity that supports effective analysis while also taking into account the varied collection capabilities of member agencies.

## HIGHLIGHTS

The 2020 data is provided on the following pages. Highlights include:

- A total of 988 releases of 42 gallons or more occurred during 2020, with a total volume of 465,072 gallons spilled. Of those, 10 releases were over 10,000 gallons.
- An additional 6,942 small spills (less than 42 gallons) occurred during 2020.

### *Non-Crude Oil Spills*

- 955 releases were non-crude oil spills totaling 313,672 gallons.
- Vehicles (33%) and Facilities (30%) were the major sources of non-crude spills during 2020, comprising nearly two-thirds of the non-crude volume for the year.
- Over half of the total non-crude spill volume was attributable to Equipment Failure (35%) or Human Error (31%).
- Static (29%) and Other (18%) were the main activities at the time of the spill.
- Spills with volumes greater than 1,000 gallons comprised over 58% of the total non-crude volume during 2020.
- Over 60% of the non-crude volume was spilled to Land (65%).

### *Crude Oil Spills*

- 33 crude oil spills totalling 151,400 gallons occurred during 2020.
- Crude oil comprised 33% the total volume for 2020.
- Pipelines (35%) and Facilities (35%) were the main sources of crude spills during 2020.
- Equipment Failure (64%) was the main cause of crude oil spills during 2020.
- During 2020, crude spills to Land (93%) comprised nearly all of the total volume.

NOTE:

- California's data submission does not include every oil spill reported to the California Office of Emergency Services (Cal OES); it does not include oil spills to land. The responsibility of response and investigation of oil spills to land falls within the jurisdiction of agencies other than the Office of Spill Prevention and Response (OSPR). Causal data, oil types, and volumes for oil spills to land are not collected by OSPR and therefore are not included in this year's report. In 2020, 7,183 hazardous material reports were generated by Cal OES. Of those, 2,117 were petroleum reported to land and 1,130 were petroleum releases to water that were either less than 42 gallons or the volume was unknown.

### *Trends*

The 2002-2020 data provides us with an opportunity to look at 19-year trends, which is also shown in this report. Here are the highlights:

- A total of 17,364, releases of 42 gallons or more occurred during the 19-year period 2002-2020, with a total volume of 13.6 million gallons.
- Over the 19-year period, the combined volume of non-crude oil spills was nearly three times that for crude oil spills.
- The top two crude oil spills during the 19-year period were 463,848 gallons in California (2008) and a 267,000 gallon spill in Alaska (2006). The combined volume of these two incidents comprised 23% of the total crude oil volume released for the period.
- Diesel Oil/Marine Gas Oil comprised 24% of the total spill volume and 32% of the non-crude oil spill volume for the period.
- Overall, Facilities (50.4%) and Pipelines (18.8%) were the major sources of spills by volume during the 19-year period.
- Facilities were the source of 53.3% of the non-crude oil spill volume.
- Pipelines (50.6%) and Facilities (42%) were the major sources of crude oil spills.
- Overall, Equipment Failure (53.3%) and Human Error (28.5%) were the major spill causes.

- Equipment Failure (45.8%) and Human Error (35.4%) were the predominant causes for non-crude oil spills
- 74.5% of the total crude oil spill volume was due to Equipment Failure.

### **FOR MORE INFORMATION**

Data summaries for calendar years 2002 – 2020, as well as other information about the Pacific States/British Columbia Oil Spill Task Force and its work, are available at [www.oilspilltaskforce.org](http://www.oilspilltaskforce.org). Summaries for years prior to 2012 are included in the Task Force Annual Reports for those years. Beginning with calendar year 2012, the data summary was created as a separate document available at [oilspilltaskforce.org/documents/other-documents/#spilldata](http://oilspilltaskforce.org/documents/other-documents/#spilldata)

For questions specifically related to this report or the Task Force's data project, contact Sarah Brace, Executive Coordinator at [Sarah@VedaEnv.com](mailto:Sarah@VedaEnv.com).

# ANNUAL SUMMARY (2020)

## Summary of Releases (42 gallons or more) by Product (2020)

Product	Spill Count	Gallons	% Total Volume
Crude Oil	33	151,400	32.6%
Diesel Oil / Marine Gas Oil	493	119,209	25.6%
Unknown	45	35,134	7.6%
Gasoline	33	28,731	6.2%
Aviation Gasoline	16	24,190	5.2%
Oily Water Mixture	27	22,541	4.8%
Asphalt / Creosote	18	21,513	4.6%
Hydraulic Oil	168	21,344	4.6%
Mineral Oil / Transformer Oil	64	10,769	2.3%

Aviation Gasoline	15,000	California	1/14/2020	Other	Other	Fresh Water
Diesel Oil / Marine Gas Oil	15,000	Alaska	6/20/2020	Public Lands	Human Error	Land
Oily Water Mixture	13,209	British Columbia	6/28/2020	Pipeline	Equipment Failure	Fresh Water
Gasoline	10,701	Washington	10/1/2020	Facility	Equipment Failure	Land
Crude Oil	10,567	British Columbia	5/26/2020	Vehicle	Unknown	Land
Asphalt / Creosote	10,500	Washington	3/18/2020	Facility	Human Error	Land

## Summary of Releases with Volume Less Than 42 gallons (2020)

Beginning with the 2016 data, the Task Force began tracking the number of spills with volumes less than 42 gallons. This data will be used to help target outreach and spill prevention efforts such as the Pacific Oil Spill Prevention Education Team (POSPET).

Detailed information about small spills is often limited or unknown because the effort necessary to investigate them is cost-prohibitive. For this reason, we are presenting spill counts only. Small spills are NOT included in the graphs or tables elsewhere in this document.

### Top Products

Product	Gallons
Diesel Oil / Marine Gas Oil	119,209
Unknown	35,134
Gasoline	28,731
Aviation Gasoline	24,190
Oily Water Mixture	22,541

- 955 releases, totalling 313,672 gallons were non-crude oil spills.

# ANNUAL SUMMARY (2020)

## NON-CRUDE SPILLS

### Summary by Source

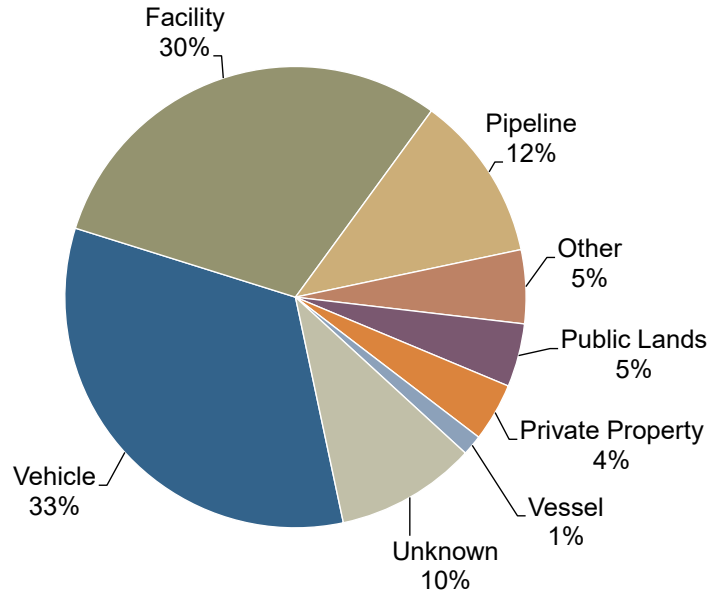

#### Top Sources

Source	Gallons
Vehicle	104,035
Facility	94,743
Pipeline	36,549
Other	27,578
Public Lands	16,199

- Vehicles (33%) and Facilities (30%) were the major sources of non-crude spills during 2020, comprising nearly two-thirds of the non-crude volume for the year.

## Non-Crude Oil Spills by Source (2020)

(percent total volume)

NOTE: "Other" includes classifications comprising 1% or less of the total volume released.

## Non-Crude Oil Spills by Source and State (2020)

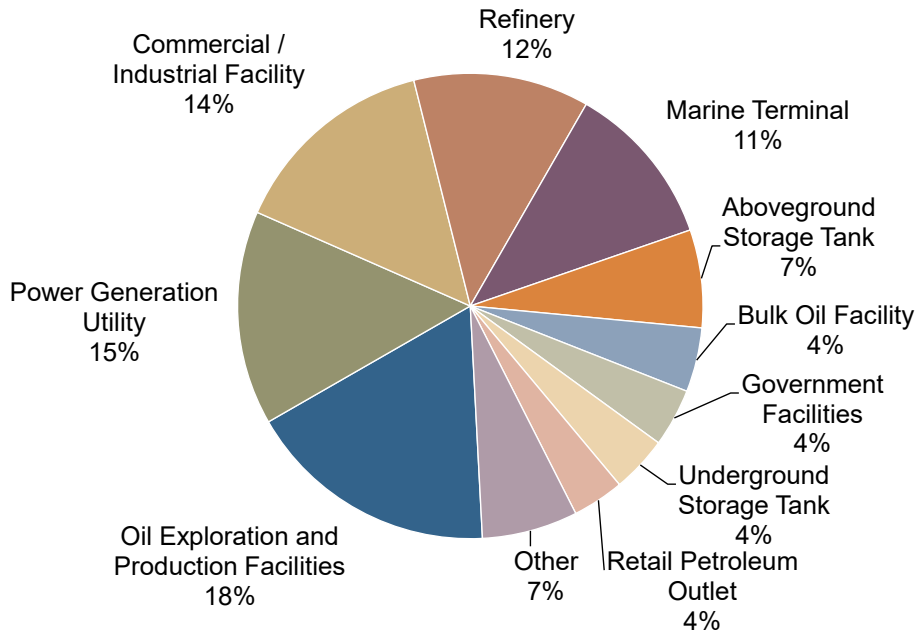

NOTE: "Other" includes classifications comprising 1% or less of the total volume released.

# ANNUAL SUMMARY (2020)

## Non-Crude Oil Spills -- Facility Detail (2020)

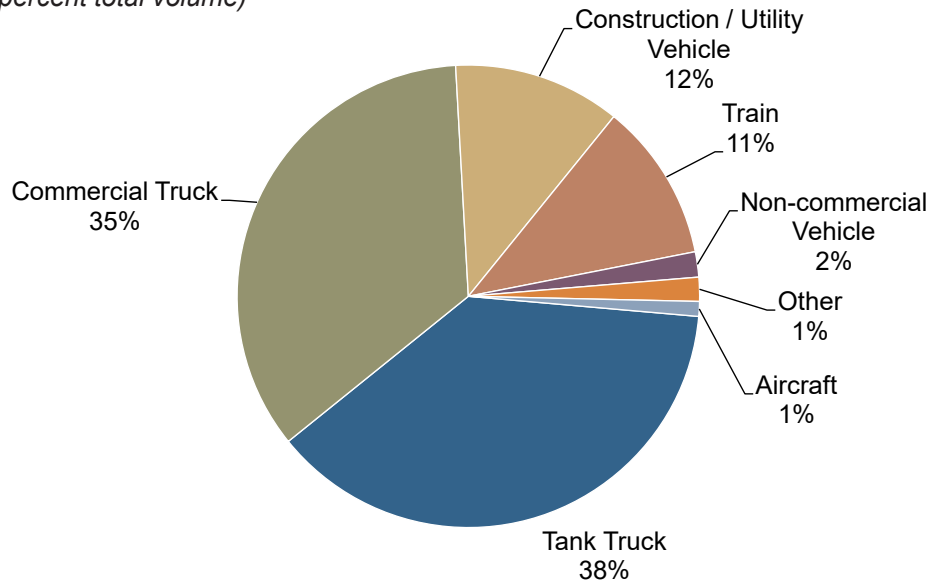

(percent total volume)

NOTE: "Other" includes classifications comprising 2% or less of the total volume released.

## Non-Crude Oil Spills -- Vehicle Detail (2020)

(percent total volume)

NOTE: "Other" includes classifications comprising 1% or less of the total volume released.

## NON-CRUDE SPILLS

### Summary by Source (continued)

- Approximately a third of the non-crude spill volume for Facilities was from Oil Exploration and Production Facilities (18%) or Power Generation Utilities (15%).
- Commercial Trucks (35%) and Tank Trucks (38%) comprised nearly three-quarters of the total non-crude spill volume for Vehicles during 2020.

# ANNUAL SUMMARY (2020)

## NON-CRUDE SPILLS

### Summary by Cause

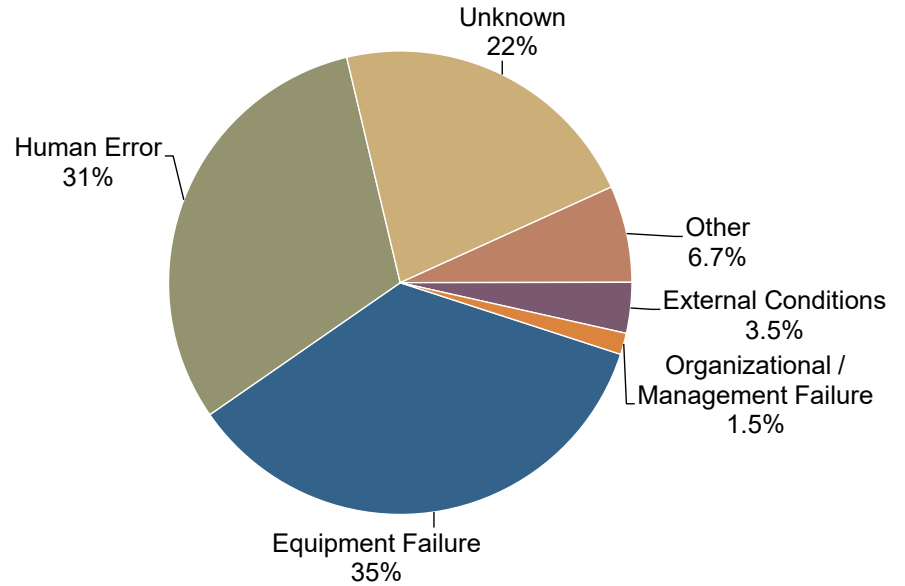

#### Top Causes

Cause	Gallons
Equipment Failure	110,896
Human Error	97,026
Unknown	68,815
Other	21,164
External Conditions	11,093

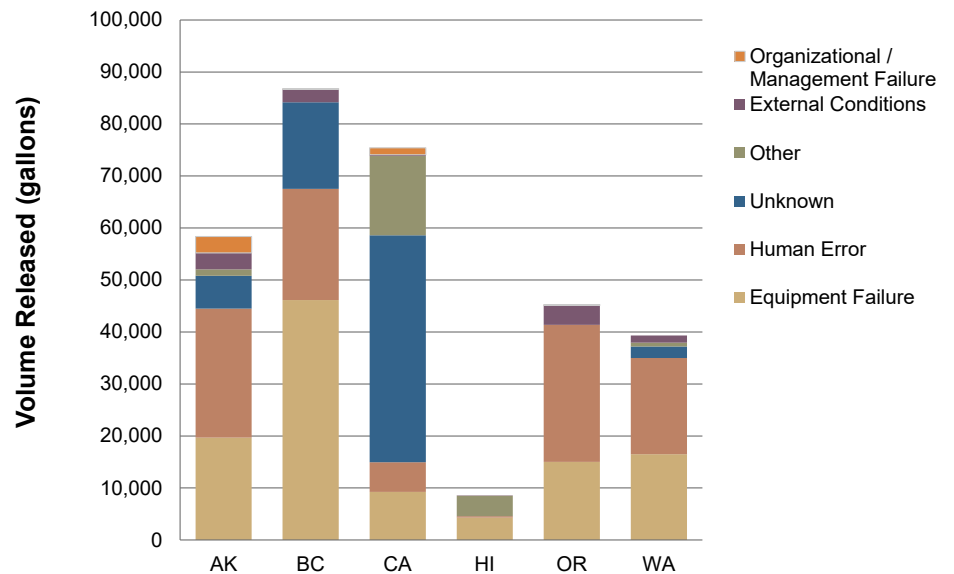

- Over half of the total non-crude spill volume was attributable to Equipment Failure (35%) or Human Error (31%).

## Non-Crude Oil Spills by Cause (2020)

(percent total volume)

## Non-Crude Oil Spills by Cause and State (2020)

# ANNUAL SUMMARY (2020)

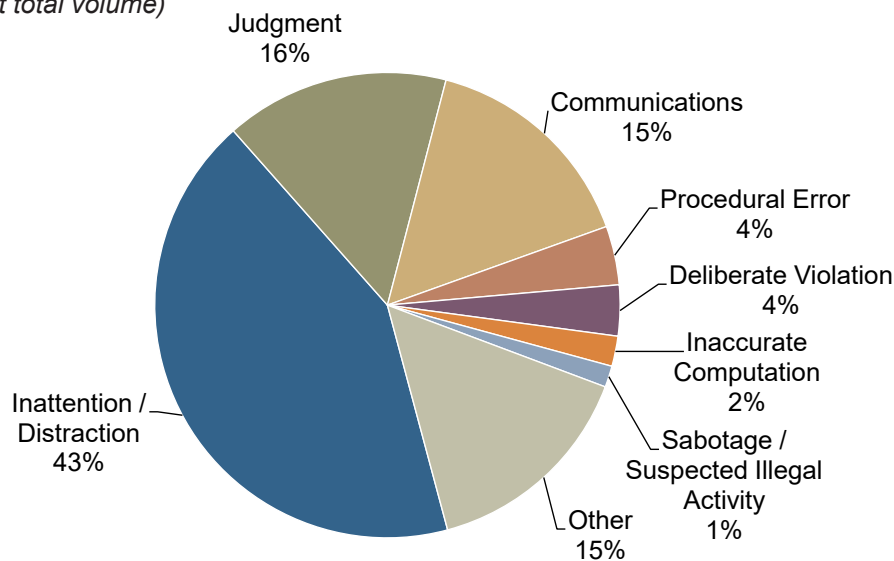

## Non-Crude Oil Spills -- Equipment Failure Detail (2020)

(percent total volume)

## Non-Crude Oil Spills -- Human Error Detail (2020)

(percent total volume)

NOTE: "Other" includes classifications comprising 1% or less of the total volume released.

## NON-CRUDE SPILLS

### Summary by Cause (continued)

- Over half of the total Equipment Failure spill volume was due to Mechanical Failure (59%).
- Inattention/distraction (43%) and Judgment (16%) comprised over half the total non-crude volume for releases due Human Error during 2020.

# ANNUAL SUMMARY (2020)

## NON-CRUDE SPILLS

### Summary by Activity

#### Top Activities

Activity	Gallons
Static <sup>1</sup>	86,274
Underway / In Motion <sup>2</sup>	66,019
Other	54,061
Oil Transfer (cargo)	43,218
Unknown	22,853

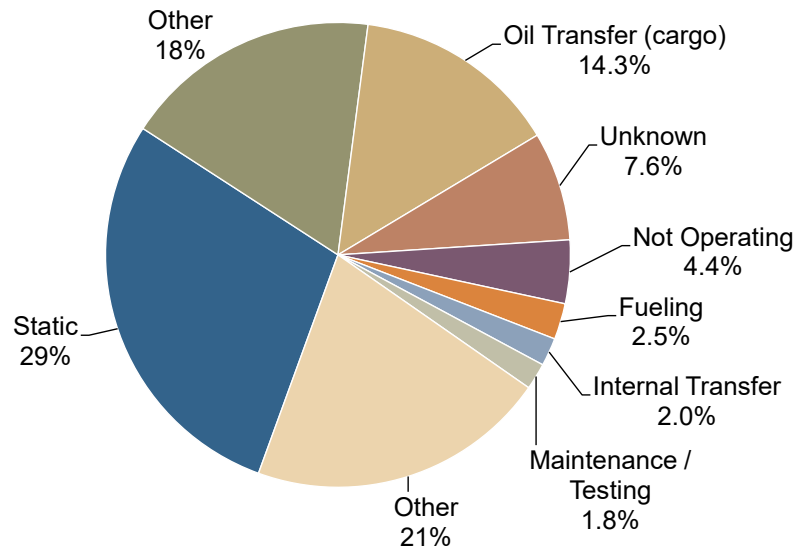

- Static<sup>1</sup> (29%) and Other (18%) were the main activities at the time of the spill.

<sup>1</sup>Static, or performing designed function, not to include oil transfers

<sup>2</sup>Underway/In Motion: (1) Vessel underway conducting normal operations, no oil movements in progress (oil movements include ballasting, tank washing, internal transfers); (2) Vehicle in motion conducting designed function

## Non-Crude Oil Spills by Activity (2020)

### Summary by Product

- Over the 19-year period, the combined volume of non-crude oil spills was nearly three times that for crude oil spills.

### Crude Oil Spills

- The top two crude oil spills during the 19-year period were 463,848 gallons in California (2008) and a 267,000 gallon spill in Alaska (2006). The combined volume of these two incidents comprised 23% of the total crude oil volume released for the period.

### Non-Crude Oil Spills

- Diesel Oil/Marine Gas Oil comprised 24% of the total spill volume and 32% of the non-crude oil spill volume for the period.

Number of Spills	168	Crude Spills	46
Releases to Water	42	Non-crude Spills	122

Product	Volume	State/Prov	Date	Source Type	Cause Type	Medium
Bunker C / IFO / HFO	321,052	Alaska	12/8/04	Vessel	Human Error	Marine
Bunker C / IFO / HFO	270,000	Washington	8/25/04	Facility	Human Error	Land
Crude Oil	267,000	Alaska	3/2/06	Pipeline	Equipment Failure	Land
Asphalt / Creosote	203,000	Washington	1/22/14	Facility	Equipment Failure	Land
Other	193,200	California	1/4/10	Facility	Equipment Failure	Land
Crude Oil	191,562	Alaska	5/25/10	Pipeline	Equipment Failure	Impermeable Surface
Other	167,202	California	9/4/17	Facility	Equipment Failure	Fresh Water
Oily Water Mixture	147,840	California	11/8/19	Facility	Unknown	Land
Diesel Oil / Marine Gas Oil	142,800	Alaska	1/11/10	Facility	Human Error	Marine
Crude Oil	140,000	California	5/19/15	Pipeline	Equipment Failure	Marine
Oily Water Mixture	128,000	California	11/26/08	Facility	Equipment Failure	Land
Crude Oil	126,000	California	3/9/07	Facility	Equipment Failure	Land
Crude Oil	126,000	California	3/23/05	Pipeline	External Conditions	Fresh Water
Aviation Gasoline	115,353	California	11/22/04	Pipeline	Equipment Failure	Land
Other	112,000	Oregon	5/4/11	Vehicle	Equipment Failure	Fresh Water
Oily Water Mixture	100,000	California	9/7/12	Facility	Equipment Failure	Fresh Water
Crude Oil	87,192	California	1/10/07	Facility	Equipment Failure	Land
Jet Fuel / Kerosene	83,000	Hawaii	5/9/17	Pipeline	Equipment Failure	Land
Gasoline	80,000	California	8/31/13	Vehicle	Human Error	Land
Diesel Oil / Marine Gas Oil	75,000	Hawaii	1/22/15	Vessel	Human Error	Marine
Asphalt / Creosote	71,000	Washington	2/8/15	Facility	Equipment Failure	Fresh Water
Mineral Oil / Transformer Oil	70,000	California	4/16/13	Facility	Human Error	Fresh Water
Crude Oil	66,318	California	10/12/19	Unknown	Unknown	Fresh Water
Oily Water Mixture	63,000	California	1/17/12	Facility	Equipment Failure	Land
Crude Oil	63,000	California	4/23/07	Facility	Equipment Failure	Land
Oily Water Mixture	63,000	California	7/29/08	Facility	Unknown	Land
Asphalt / Creosote	60,000	California	12/27/14	Facility	Unknown	Land
Diesel Oil / Marine Gas Oil	58,800	California	7/7/07	Facility	Human Error	Land
Oily Water Mixture	58,128	California	4/6/14	Facility	Equipment Failure	Land
Bunker C / IFO / HFO	58,000	California	11/7/07	Vessel	Human Error	Marine
Crude Oil	44,909	British Columbia	6/13/20	Pipeline	Equipment Failure	Land
Crude Oil	44,755	California	6/23/16	Pipeline	Human Error	Marine
Crude Oil	42,000	California	6/12/07	Pipeline	Equipment Failure	Land
Crude Oil	42,000	Oregon	6/3/16	Vehicle	Equipment Failure	Fresh Water
Oily Water Mixture	42,000	California	8/11/15	Unknown	Unknown	Land
Mineral Oil / Transformer Oil	42,000	California	12/8/10	Facility	Equipment Failure	Land
Crude Oil	42,000	California	10/23/12	Facility	Organizational / Management Failure	Fresh Water
Diesel Oil / Marine Gas Oil	40,000	Washington	8/8/05	Facility	Human Error	Land
Crude Oil	40,000	California	4/17/07	Pipeline	Equipment Failure	Land
Oily Water Mixture	37,800	California	3/21/19	Other	Unknown	Land
Oily Water Mixture	37,306	California	11/11/06	Facility	Equipment Failure	Impermeable Surface
Oily Water Mixture	36,750	California	6/24/09	Facility	Equipment Failure	Land
Unknown	35,910	California	12/3/13	Facility	Equipment Failure	Land

# SPILL TRENDS (2002-2020)

## Spills Greater than 10,000 Gallons -- continued

Product	Volume	State/Prov	Date	Source Type	Cause Type	Medium
Diesel Oil / Marine Gas Oil	35,456	Alaska	2/11/17	Vessel	External Conditions	Marine
Oily Water Mixture	33,600	California	4/14/06	Pipeline	Equipment Failure	Impermeable Surface
Jet Fuel / Kerosene	33,600	California	2/15/10	Vessel	Organizational / Management Failure	Marine
